

## **Job Description**

We are looking for an ASP.NET MVC developer with at least 3 years of experience, who will be able to develop and support existing ERP applications. The main scope of work will include everything from back-end to front-end code, using optimal and efficient technologies, frameworks, and patterns. Your primary responsibilities will be to design and develop these applications. The applicant should be skilled at problem solving, solution design, and high-quality coding.

## **Responsibilities**

- Delivering high-quality solutions
- Writing test-backed server-side code
- Analyzing requirements and designing new functionality
- Supporting and fine tuning existing functionality
- Selecting and using the most appropriate and efficient technologies for a particular application
- Designing and building application layers

## **Skills**

- Experience in developing [ASP.NET](#) MVC applications
- Knowledge in Entity Framework
- Proficient knowledge in MSSQL
- Database design including indexes and data integrity
- Implementing enterprise application patterns
- Understanding of HTML, JS, and CSS and jQuery
- Knowledge in SSRS / other reporting tools
